

Could you help with the training of your future Doctors?

We are always looking for patients who are happy to give up a little of their time to meet with our medical students

Throughout the year we have pairs of **3rd Yr Medical Students** working in practice (usually on a Wednesday).

As part of their placement in practice they need to meet with patients with certain conditions such as:

Diabetes

Rheumatoid Arthritis

Multiple Sclerosis

COPD

Patients with Severe Hearing Loss

Registered Blind

OR

Any other condition -

so long as you are happy to come into practice to meet with the students. The students usually ask for around 30/40 minutes with you to take a history & carry out an examination and talk about how the condition affects you.

This helps the students gain experience of certain conditions and also develop their examination skills. The students will then present this back to their GP Supervisor (Dr Macleod or Dr Wooldridge)

If you would be happy to be involved with this—please pass your name to your doctor/nurse or receptionist and we will contact you
